

Hi, my name is Treva Alexander, the Information Security Management course manager.

If you are assigned as an information security specialist or manager within a DoD component, or have mid-level experience in the DoD Information Security Program, then the Information Security Management Course is for you.

This seven day mid-level course offers an interactive, blended learning environment where instructor-led training is enhanced through hands-on facilitated practical application; and the lessons include discussions related to information security management, ideas, problems, and solutions.

If you attend the Information Security Management Course you will leave with the knowledge and skills necessary to effectively implement and/or oversee DoD Information Security programs, policies and guidelines.

Additional information regarding the Information Security Management Course, including prerequisite course information and clearance requirements, is available from the CDSE course catalog.

I look forward to seeing you in the Information Security Management Course.

Thank you.
