

Hi, my name is Andrew Reyes, the course manager for the JPAS/JCAVS Training for Security Professionals Course, also known as the JPAS Course.

If you are a new security manager, facility security officer for a small or large company, or just want to brush up on your JPAS skills then the JPAS Course is right for you!

This interactive course offers a blended learning environment to help you address the challenges often associated with working on a computer database.

If you attend the JPAS Course, you will leave with the skills, confidence and tools necessary to function within the JCAVS subsystem of JPAS.

You will be able to:

- perform account manager duties; for example, create security management offices or SMO
- perform JCAVS user functions
- in-processing person categories into your PSM Net
- as well as granting access and submitting investigations via the JPAS interface with e-QIP

Additional information regarding the JPAS/JCAVS Course, including prerequisite course information, and student handbook is available on our CDSE course catalog.

I look forward to seeing you in a future class.
